

Diversity of Venezuelan Stylosanthes (Leguminosae)

Filesize: 9.68 MB

Reviews

Thorough guideline! Its this kind of excellent read. This is certainly for all those who statte there was not a well worth reading. Your way of life period will probably be transform once you complete reading this book.

(Mrs. Alia Borer)

DIVERSITY OF VENEZUELAN STYLOSANTHES (LEGUMINOSAE)

Cuvillier Verlag Apr 2012, 2012. Buch. Book Condition: Neu. 211x149x17 mm. Neuware - Stylosanthes is a mainly Neotropical legume genus. South America is considered as the main centre of diversity of Stylosanthes species whose centre of origin probably lies also here. Stylosanthes is of economic importance; currently, some species are used in Australia, tropical Asia, sub-Saharan Africa and tropical America as forage, soil cover, for soil improvement and for the production of concentrate feed for livestock. The genus comprises about 25 species but in the literature estimates of up to 50 species can be found. This is a consequence of the high morphological plasticity of Stylosanthes species leading to uncertainties regarding species delimitation. Differences among Stylosanthes taxonomical revisions are due to the respective author's species concept, i.e., based on floral morphology versus vegetative characters. An example of such different viewpoints is the so-called Stylosanthes guianensis complex where most members are treated as separate species by some authors and as botanical varieties by others. In the last two decades, scientists have started to use DNA data in an attempt to overcome the taxonomical problems of the genus Stylosanthes. However, so far, the combined analysis of both morphological and genotypic characteristics in taxonomic studies has not been used in Stylosanthes, neither in a supplementary nor in a complementary manner. Venezuela has a high Stylosanthes species richness and 12 species have been reported in the country, namely *S. capitata*, *S. diarthra*, *S. gracilis*, *S. guianensis*, *S. hamata*, *S. humilis*, *S. mexicana*, *S. nervosa*, *S. scabra*, *S. sericeiceps*, *S. tuberculata* and *S. viscosa*. Until now, the taxonomic status of some of these species remains unclear and information about the distribution of the species in the country is scarce. However, for actions like the sound management of biological diversity, including its conservation, a good understanding of the taxonomy...
