Audible Studios on Brilliance, United States, 2016. CD-Audio. Book Condition: New. Unabridged. 170 x 135 mm. Language: English . Brand New. An award-winning environmental journalist introduces a new generation of farmers and scientists on the frontlines of the next green revolution. When the demographer Robert Malthus (1766-1834) famously outlined the brutal relationship between food and population, he never imagined the success of modern scientific agriculture. In the mid-20th century, an unprecedented agricultural advancement known as the Green Revolution brought hybrid seeds, chemical fertilizers, and improved irrigation that drove the greatest population boom in history but left ecological devastation in its wake. In *The End of Plenty*, award-winning environmental journalist Joel K. Bourne Jr. puts our race to feed the world in dramatic perspective. With a skyrocketing world population and tightening global grain supplies spurring riots and revolutions, humanity must produce as much food in the next four decades as it has since the beginning of civilization to avoid a Malthusian catastrophe. Yet climate change could render half our farmland useless by century's end. Writing with an agronomist's eye for practical solutions and a journalist's keen sense of character, detail, and the natural world, Bourne takes readers from his family farm to international agricultural hotspots to introduce the new generation of farmers and scientists engaged in the greatest challenge humanity has ever faced. He discovers young, corporate cowboys trying to revive Ukraine as Europe's breadbasket, a Canadian aquaculturist channeling ancient Chinese traditions, the visionary behind the world's largest organic sugar-cane plantation, and many other extraordinary individuals struggling to increase food supplies quickly and sustainably as droughts, floods, and heat waves hammer crops around the globe. Part history, part reportage and advocacy, *The End of Plenty* is a panoramic account of the future of food, and a...
