

Structure and Dynamics of Elementary Matter: Proceedings of the NATO ASI on Structure and Dynamics of Elementary Matter, Camyuva-Kemer (Antalya), Turkey, from 22 September to 2 October 2003 (Paperback)

By -

Springer-Verlag New York Inc., United States, 2004. Paperback. Book Condition: New. 234 x 157 mm. Language: English . Brand New Book ***** Print on Demand *****. Ladies and gentlemen, dear colleagues, welcome to Kemer to the NATO Advanced Study Institute Structure and Dynamics of Elementary Matter. We have chosen Kemer as the place of our NASI because it is located in a beautiful and hospitable surrounding. This part of the Mediterranean at the Turkish Riviera is a historic region where many cultures meet (e.g., the Oriental and the Greek and Roman European cultures) and where you find numerous places which played a role in ancient science and in early Christianity. Moreover, with the hotel Ceylan Inter-Continental we have found a most excellent meeting place, directly located at the beach, equipped with wonderful swimming pools and restaurants - an absolutely first-class location. Our NASI will deal with the most recent developments in high-energy heavy ion physics and in the search for superheavy nuclei - two rather distinct areas of research. Indeed, we want to bring two very active communities of nuclear and high-energy physics into close contact. The meeting is both a school and has also the character of a conference: A school because there are many advanced students, many of which are themselves

Reviews

It is one of the most popular publication. It is actually written in easy words instead of confusing. You will like how the author created this book.

Undoubtedly, this is the best job by any article writer. This really is for all those who state that there was not a worthwhile reading. I am very easily able to get an enjoyment of reading a published pdf.
