Not illustrated. 1885 Excerpt: .ratio the earth started at the first fraction of that power found. And this is in contrast to the value by the third column of this Table, and the same stage of Table 3; or already passing the reduction from a unit, actual, taken in Table 3, so the reduction, or addition from, or to, the ultimate unit as a base could never be, or ever become, that for the earth. No such fractions could appear by 8192 miles if we had started by it in reverse also. So true science tells us, even if Kevelation had not, that the earth started on the unformed in all respects. What is her loss from 8192 by 79121 It is 280. Our square for a standard, also, with Table 3, gives us its paternal rule over circle roots, proportional, $70 \times 8 = 560$ (Diagram 4). This, divided by two, to show the loss on proportional agencies in one body for action and reaction, as of life introduced, --i.e., between the hemispheres thereof, --gives $560 \div 2 = 280$. So the proportion provided is true to the command by the root ruler over all, at Jehovah s wisdom and hand. The earth was, then, clearly made true to the standard for a primal female--mother to all, and her susceptibility is of fractionally refining sympathies under light, for her thirst and operations thereby. Also, we have her preparation for the sun to come in, as the light condenser, also after her, on evidence....
